My Open Source journey

1. Identifying your core values

From the list below, circle your top **five core values.**

💡 *You probably have some guiding principles that inform your decision-making, goal-setting, and overall disposition; these are your core values. Together, they shape how you interact with the world around you. This is a limited list of values, so feel free to add any missing values.*

Accountability	Growth	Reliability
Authenticity	Honesty	Respect
Bravery	Improvement	Responsibility
Compassion	Innovation	Self-respect
Connection	Integrity	Self-awareness
Curiosity	Justice	Status
Determination	Knowledge	Sustainability
Dependability	Leadership	Thoughtfulness
Efficiency	Love	Trust
Empathy	Loyalty	Truth
Fairness	Openness	Uniqueness
Freedom	Recognition	Wealth
		Wisdom

2. Open source alignment

Which of your core values align with open source? Mark them with a checkmark ✔️.

3. Taking time to reflect...

Take time to reflect on your open source involvement and how you can use it to plan your career development.

1. Are there any open-source practices of yours that could be improved to align with open source values?

_____

_____

_____

_____

2. How does your open source journey look like? Make a timeline or map for your open
    source journey.
    *It does not have to be a detailed map or even super aesthetically pleasing. The goal is
    to reflect on how your involvement and role have changed over time.*

3. Describe your open source career goals.

A good way to think about goal setting is to make them SMART: specific, actionable, relevant, and time-bound.

For example, I would like to mentor two new contributors to napari in the upcoming 6 months.

_____
